Safe Water Chart

From Prayer 2 Provision

Tape this inside a kitchen cabinet so it is ready when you need it.

MAKE WATER SAFE IN 3 STEPS

1 Settle
Let cloudy water sit so dirt sinks. Pour the clear water off the top.

2 Filter
Pour through a cloth or coffee filter, then your personal water filter.

3 Disinfect
Boil it, or use regular unscented liquid chlorine bleach with the chart below.

BOILING (BEST)

Bring water to a full rolling boil for 1 minute, then let it cool.

BLEACH CHART: REGULAR, UNSCENTED LIQUID CHLORINE BLEACH

WATER	6% BLEACH	8.25% BLEACH
1 quart	2 drops	2 drops
1 gallon	8 drops	6 drops
2 gallons	16 drops (1/4 tsp)	12 drops (1/8 tsp)
4 gallons	1/3 tsp	1/4 tsp
8 gallons	2/3 tsp	1/2 tsp

Stir and wait **30 minutes**. It should smell faintly of chlorine. If not, add the same dose again and wait 15 more minutes. Still cloudy? Double the dose. Use regular, unscented liquid chlorine bleach only: no scented, splash less, or color safe bleach.

POOL SHOCK (LONG TERM)

Calcium hypochlorite only. Stock solution (**NOT for drinking**): 1 heaping teaspoon in 2 gallons of water. Treat: 1 part stock to 100 parts water (about 1 pint per 12.5 gallons). Wait 30 minutes. Store it sealed, dry, and away from fuel and children.

HOW MUCH TO STORE

1 gallon per person per day. Aim for 2 weeks. A family of 4 needs 56 gallons, plus water for pets.

Filled on: _____

Replace by (6 months): _____

"And the LORD shall guide thee continually, and satisfy thy soul in drought."

— ISAIAH 58:11 (KJV)
